

Expand-O-Lizer® URS Under-Reamed Service

Product:

Downhole Products Expand-O-Lizer 'Under-Reamed Service' is a single piece centralizer designed for tight tolerance applications with the ability to recover full starting O.D. when in the under-reamed section.

Features:

- Single piece, spring steel design
- Flexible design significantly reduces running forces
- Oversized O.D. provides maximum standoff in the open-hole section
- Restoring forces greater than API standards
- To be run in conjunction with Downhole Products HD Stop Collar

Options:

- Centralizer placement / T&D analysis available
- Dedicated engineering support team
- Product design to meet specific application requirements
- Size range from 4-1/2" – 20"
