

Grippy™ Pro

Cable Clamp Control Line Protector

Product:

Downhole Products Grippy Pro control line protectors provides maximum support and protection to the cable and control lines across the coupling. Suitable for a wide range of configurations such as control lines, ESP cables, umbilical lines and encapsulated bundles, cased and open environments.

Features:

- Offering the ultimate in cross-coupling control line and cable protection
- Fast and simple installation
- Designed for use in high-angled and deviated well-bores
- Engineered to hold 100ft of cable and control line
- Engineered to bear high rotational and axial loads
- Interlocking design houses and protects installation bolts from sheer stress
- All protectors are re-useable

Options:

- Custom designs available upon request
- Mid-joint clamps available
- Sizes 2-3/8" to 9 5/8"
- Full configurations for flat, round, bare control line and fiber optics
- Available in carbon steel, stainless steel and nickel alloy grades
- NACE MR-01-75 compatible options available
- Full engineering and service packages available
